## What do the 3 days cover?

### Day 1 - Influential leadership: Non-verbal communication and practical skills for one-on-one interactions

In this Master Class the focus is on the building blocks for improved communication – verbal and non-verbal skills that give you the ability to be more effective in your one-on-one and group interactions.

You will have a chance to practice skills, and be given new ways of thinking about human behavior so that you can better get what you want from your interactions with others.

### Day 2 – Influential leadership: How to get the most from meetings or working with groups and teams

In this Master Class we share a simple model for improving the effectiveness of meetings that, in our experience, “really sticks” because it makes sense and is easy to remember and use.

We will cover the importance of preparation, and what needs to be thought about before you walk into a meeting. We give you some specific processes, meeting designs and tips on how to manage people or difficult group dynamics so that you get your outcomes.

All that you learn in this Master Class has practical application to effectively managing group dynamics that you need on a daily basis when you work with teams.

### Day 3 – Influential leadership: Using an approach that really works for solving difficult problems

In this Master Class you will be introduced to a different type of thinking especially suited to many of the problems people in organizations face.

You will be taught a practical approach that has worked across all sectors and in the enormous variety of organizations that Dalmau Consulting has worked with.

This approach works really well for diagnosing problems, planning, mapping conversations, coaching, managing projects and aligning people for action.

You will have the opportunity to work on a difficult problem that you face and come away with some new approaches specific to your problem.
